## SUMMARY

---

**Junior .NET Backend Developer** skilled in ASP.NET Core, C#, and SQL Server, eager to contribute to **Ezz Medical** by building secure, high-performance backend systems that power impactful healthcare solutions.

## WORK EXPERIENCE

---

### Full Stack Development Track (.NET)

Digital Egypt Pioneers Initiative [🔗](#)

October 2024 – May 2025

Beni Suef, Egypt – Hybrid

- Built scalable web applications using the .NET framework, including C#, ASP.NET Core, Entity Framework, and SQL Server, with a focus on performance optimization.
- Completed intensive coding sprints and collaborative workshops, leading team projects that simulated real-world development challenges.

### Freelance Web Developer

Upwork [🔗](#)

September 2025 – Present

Remote

- Developed and edited WordPress and Wix websites, improving structure, content quality, and overall user experience.
- Managed and updated CMS platforms for educational websites, organizing course and diploma content with high accuracy.
- Provided virtual assistance including administrative tasks, content updates, and project coordination.

## EDUCATION

---

### B.Sc. in Computer Science, Nahda University

Fourth Year Student

October 2022 – Present

Beni Suef, Egypt

- **cGPA:** 3.63

## TRAININGS

---

### Web Development using .NET

Information Technology Institute [🔗](#)

August 2025 – August 2025

Remote

- Developed and deployed a full-featured web application using ASP.NET Core and SQL Server, CRUD operations.
- Optimized application performance and maintainability by applying clean architecture, layered design, and code reusability principles during the training projects.

- Collaborated on AI solutions while documenting processes to enhance peer understanding.
- Explored Agentic AI, understanding how autonomous AI agents optimize workflows and automate complex tasks efficiently.

## PROJECTS

---

### Blog Web API

Aug 2025 - Present

#### RESTful ASP.NET Core Web API [↗](#)

- Implemented Onion Architecture with the repository pattern to ensure modularity, maintainability, and clean separation of concerns across application layers.
- Developed a secure, scalable RESTful Web API leveraging JWT-based authentication and role-based authorization, protecting user accounts and content management endpoints.
- Optimized data handling by configuring AutoMapper for seamless DTO-to-entity transformations and enforcing CORS policies for controlled cross-origin communication.
- Improved observability and troubleshooting with structured logging via Serilog, while documenting and testing endpoints using Swagger UI to accelerate developer onboarding.
- Leveraged Entity Framework Core and SQL Server to build efficient database interactions, including migrations, LINQ queries, and performance-tuned CRUD operations.

### To-Do List Web API

Jul 2025 - Jul 2025

#### RESTful ASP.NET Core Web API [↗](#)

- Designed and developed a RESTful Web API using ASP.NET Core 8 to manage to-do items with full CRUD functionality and date-based filtering.
- Integrated Serilog for structured logging, and used Swagger for API documentation and testing, improving maintainability and developer experience.
- Gained hands-on experience with backend frameworks, data modeling, and deployment-ready API documentation tools.
- Strengthened understanding of validation techniques, maintainable API design, and performance-oriented development workflows.

## SKILLS

---

- **Programming Languages:** C#, C++, Python.
- **Framework and libraries:** .NET Core, LINQ.
- **Database Management:** SQLite, SQL Server.
- **General:** Object-Oriented-Programming, Data Structures, Algorithms, SOLID Principles, Design Patterns, Clean Architecture.
- **Tools and Technologies:** Git, GitHub, and Postman.
- **Soft Skills:** Problem solving, Communication, Team work, Leadership.
